Barilla Veggie Farfalle
with Roasted Red Pepper and Pine Nuts
WELCOME TO OUR TABLE

Part of our Italian heritage is sitting together around the dinner table with our family and friends, savoring the taste of home-cooked pasta and sharing stories about our days. Meaningful moments like those—where you make the time to connect over a good meal—really do create some of the best memories.

But today, life is busier than ever. It’s no surprise, really, that when we asked, we found that 58 percent of parents said their life is more hectic than it was a year ago. With all the wonderful things that being part of a family gives us, there are also responsibilities—people to take care of, errands to run, to-do lists to complete and schedules to balance.

At Barilla, we know that despite the challenges, dinnertime is important—and our survey showed that as parents, you worry that if you don’t put a home-cooked meal on the table, your family’s nutrition suffers and you’ll miss out on valuable family time. That’s why we created this special edition cookbook, to help bring families together over a bowl of pasta, a traditional favorite that’s also a modern-day solution for even the most chaotic day. It’s versatile, quick, nutritious, affordable, a crowd-pleaser and allows you to multi-task while it’s cooking.

In the pages that follow, you’ll find convenient icons that represent top barriers to mealtime in American households alongside recipes to help make dinner enjoyable and possible for your family. With each delicious pasta dish, we’ve also included a tip that takes into account your busy schedules.

Buon appetito!

THE BARILLA STORY

Though today Barilla is the world leader in pasta production, manufacturing over 4,000 tons of pasta daily in over 150 shapes and sizes, those who work with us continue to carry on the traditions of our founder, Pietro Barilla.

In 1877, Pietro opened a modest pasta shop on Via Vittorio Emanuele, a busy shopping street in the northern Italian city of Parma, located in Emilia-Romagna, a region renowned for its cuisine and rich agricultural heritage. Pietro and his son, Riccardo, worked side by side making fresh bread and pasta by hand. The signature sunshine-yellow, horse-drawn carts would travel through the early morning streets of Parma, laden with fresh Barilla products. By the turn of the century, father and son purchased a warehouse in Parma, which still stands on the same street—today named Via Barilla.

From the beginning, product quality has been paramount for Barilla, a factor dependent on the superior quality of the durum wheat flour, or semolina, used to make our pasta. Legend has it that Riccardo Barilla would dust the sleeves of his black suit with the semolina. If no specks remained after he brushed it off, the flour was dry enough and finely ground enough to use in Barilla pasta.

Today, Guido, Luca and Paolo Barilla, fourth-generation members of the Barilla family, carry on Pietro’s dedication to tradition and excellence. At the heart of Barilla is a deep belief that pasta is more than just an ingredient; it is the central thread that binds a culture and families.

We believe that sharing meals should be a joyful, convivial experience. In everything we make, we express our commitment to bringing that experience to families around the world.

PERFECT PASTA IS AS EASY AS

Appearance: pasta with a golden, amber color is a sign of good-quality wheat.

Bite: good pasta should cook al dente every time. Al dente, or "to the tooth" simply means that finished pasta should have tiny bit of resistance or "bite" to it.

Clarity: cloudy cooking water is a sign that excess starch is being released which results in sticky, clumpy pasta. Pasta made with the highest quality durum wheat, such as Barilla, should not release a lot of starch.

Doesn’t clump, stick or break: pasta made with the best durum wheat should not clump, stick or break during cooking. Serve pasta immediately to ensure the best pasta meal experience.

Elasticity: pasta, particularly a long cut, should be springy and lively (never limp) and should always hold its shape.
